At the heart of Chandigarh's dental landscape is a duo driven by passion, precision, and purpose—Dr. Rajat Dang and Dr. Dipti Dang. Founders of Dr. Dangs Dental Excellence, their clinic stands as a beacon of cutting-

edge care and heartfelt service (www.chandigarhlaserdentist.com). With a shared dream and complementary strengths, this husband-wife team has built more than just a practice—they've created a trusted space where smiles are transformed and patient confidence is restored, one treatment at a time.

What inspired you both to pursue dentistry and eventually open your own practice in Chandigarh?

Dr. Rajat Dang: For me, dentistry has always been the perfect blend of science and artistry. It gives me the opportunity to help people regain their confidence through their smiles.

Dr. Dipti Dang: I've always been fascinated by the precision and care that dentistry demands. Opening our own practice was a shared dream—to create a space that reflects our values, where patients are treated with compassion, innovation, and the highest standards of care.

How did the idea of working together as a couple in the same field come about?

Dr. Dipti Dang: It happened quite naturally. We both share the same professional values and work ethic. Rather than working separately, we saw an opportunity to build something meaningful together.

Dr. Rajat Dang: And honestly, our different strengths complement each other well. It's a synergy that benefits not only us but also our patients.

What sets your clinic apart from others in the region?

Dr. Rajat Dang: At Dr. Dangs Dental Excellence, we focus on minimally invasive, technology-driven treatments. Since our inception in 2005, we've used state-of-the-art equipment like CBCT, hard and soft tissue dental lasers, scanners, and dental microscopes. Our patient-centered approach makes the entire experience smoother and more comfortable.

Dr. Dipti Dang: We also invest heavily in patient education, ensuring that everyone leaves with a better understanding of their dental health. That's something our patients truly value.

Tell us about the most rewarding part of your work.

Dr. Dipti Dang: For me, it's seeing someone walk out of the clinic with a renewed sense of confidence. Transforming a smile can completely change how someone feels about themselves.

Dr. Rajat Dang: And the trust we build with our patients—that's incredibly fulfilling. When someone refers a loved one to us, it's the highest compliment.

What challenges have you faced while building your practice, and how did you overcome them?

Dr. Rajat Dang: Like any new venture, we faced our share of hurdles—staffing, investing in advanced equipment, and building patient trust from scratch.

Dr. Dipti Dang: But with perseverance, staying updated with global best practices, and positive word-of-mouth referrals, we overcame those early obstacles.

How do you balance professional responsibilities with personal life as a married duo?

Dr. Dipti Dang: It's not always easy, but

we've learned to set boundaries. Once we're home, we try to disconnect from work.

Dr. Rajat Dang: We also make time for ourselves—traveling, reading, or simply relaxing together. Being in the same field means we understand each other's pressures, which really helps.

What dental trends or treatments are gaining popularity among patients today?

We offer all the latest dental treatment modalities under one roof—from advanced diagnostics using CBCT and digital planning, to smile designing, veneers, and dental implants. These comprehensive, technology-aided solutions are what patients are increasingly seeking.

Q. What's next for Dr. Dangs Dental Excellence?

Simple—growth with purpose. We're embracing the latest in digital dentistry to offer more comfortable and precise treatments. Our goal remains the same: excellence in every smile. It's about giving back and continuing to build a space where patients feel truly cared for. **um**
